

mivune

everything

is under

control

## The mivune prodigy...

Imagine:

With an installed mivune system you are able to control a whole building with one click on your mobile phone. Lights, power, air-condition, security and much more.

### ...is not a miracle!

mivune is a multi compatible environment management and control system. It's all about intelligent technology. Made for you to simplify your life.

### Our goal:

Your lifetime without effort. Why should we waste time and money managing and maintaining several different systems if there is one for all?

Let's be mivune

- smart
- safe
- effective
- energy saving

Made in Switzerland!

One remote for  
all **systems**

Your building at a fingertip.

## From television to air-condition

We don't want to bore you by numerating the **mivune** controlable devices. Use your imagination, look around! Almost every device in your periphery could be part of the mivune world.

**Use your imagination**

# one click control

## mivune the brain for buildings

You already have controlling systems?

One for AC, one for security, one for entertainment?

Several remote controls?

Forget them all.

mivune sits on top off all these systems

and manages them for you!

Now everything is operated by one single device.

40%

Saving up to **40%** of energy with **mivune**

## It's browser-based

That implies:

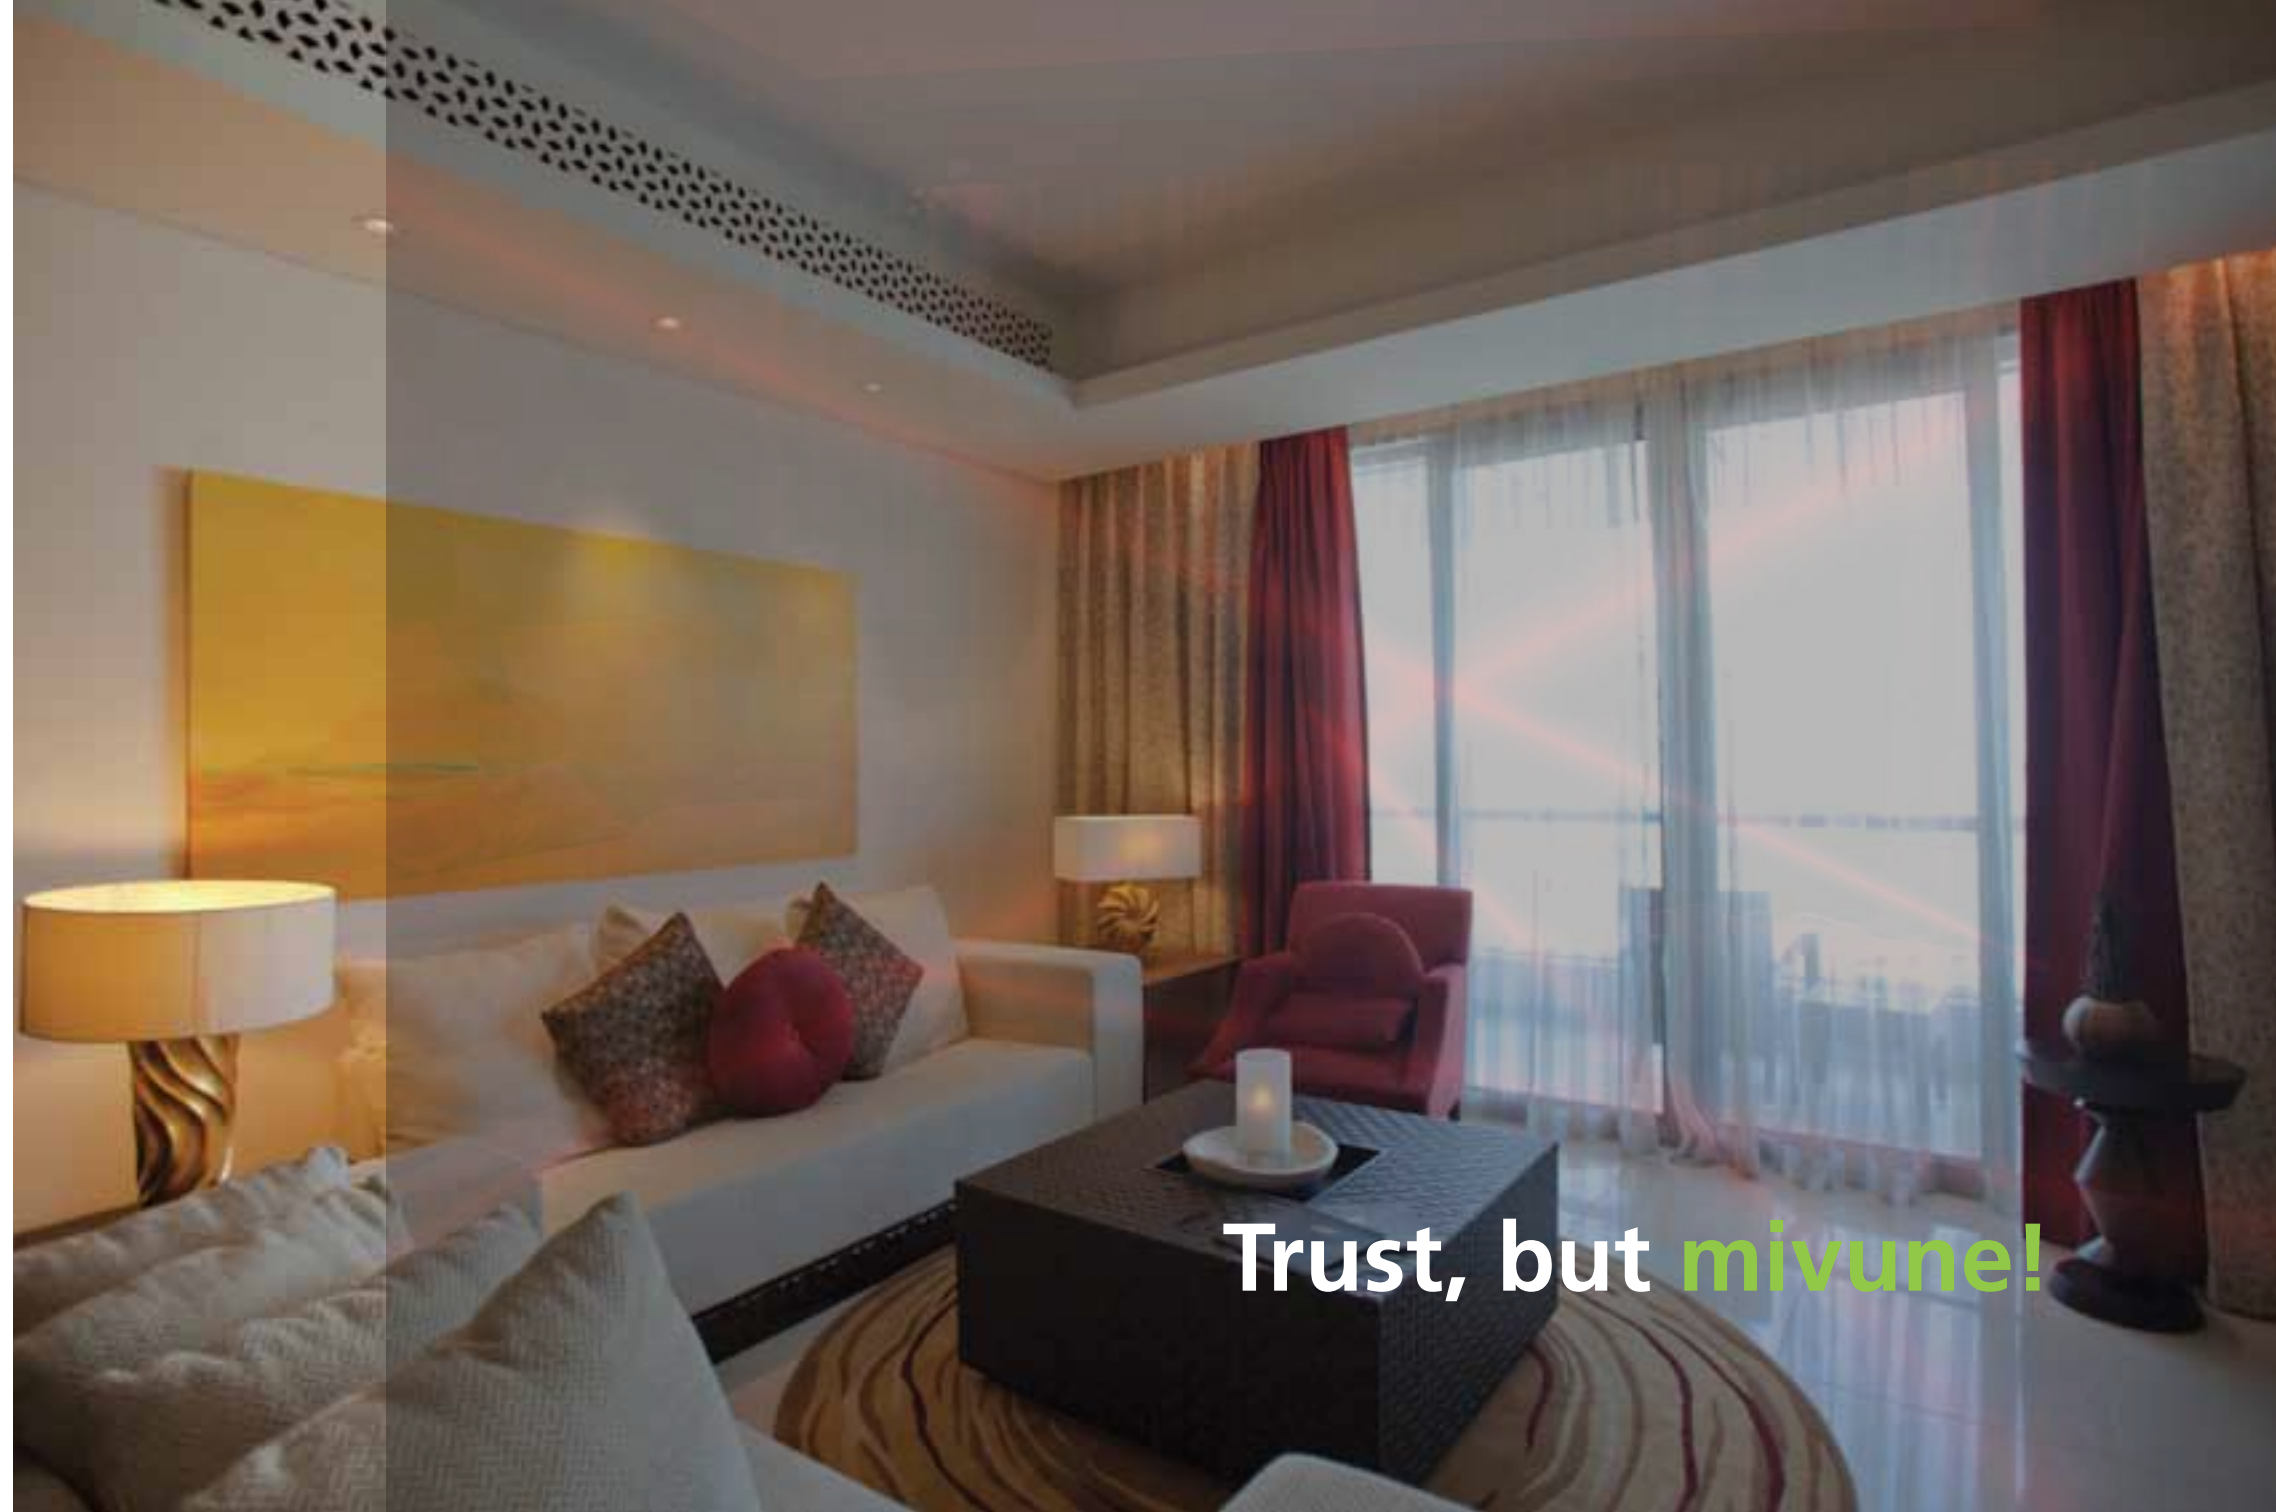

Whenever you have internet access  
you have access to **mivune!**

Do whatever **you** want  
wherever you are

## Safety matters

Our building needs care, sometimes even when we are not at home. What if we have left a window open before leaving our building and it starts raining? Or what if, while we are on a longer trip, our abandoned home attracts burglars?

Trust, but **mivune!**

# Start your day **stressless**

Relax in the **mivune** world.

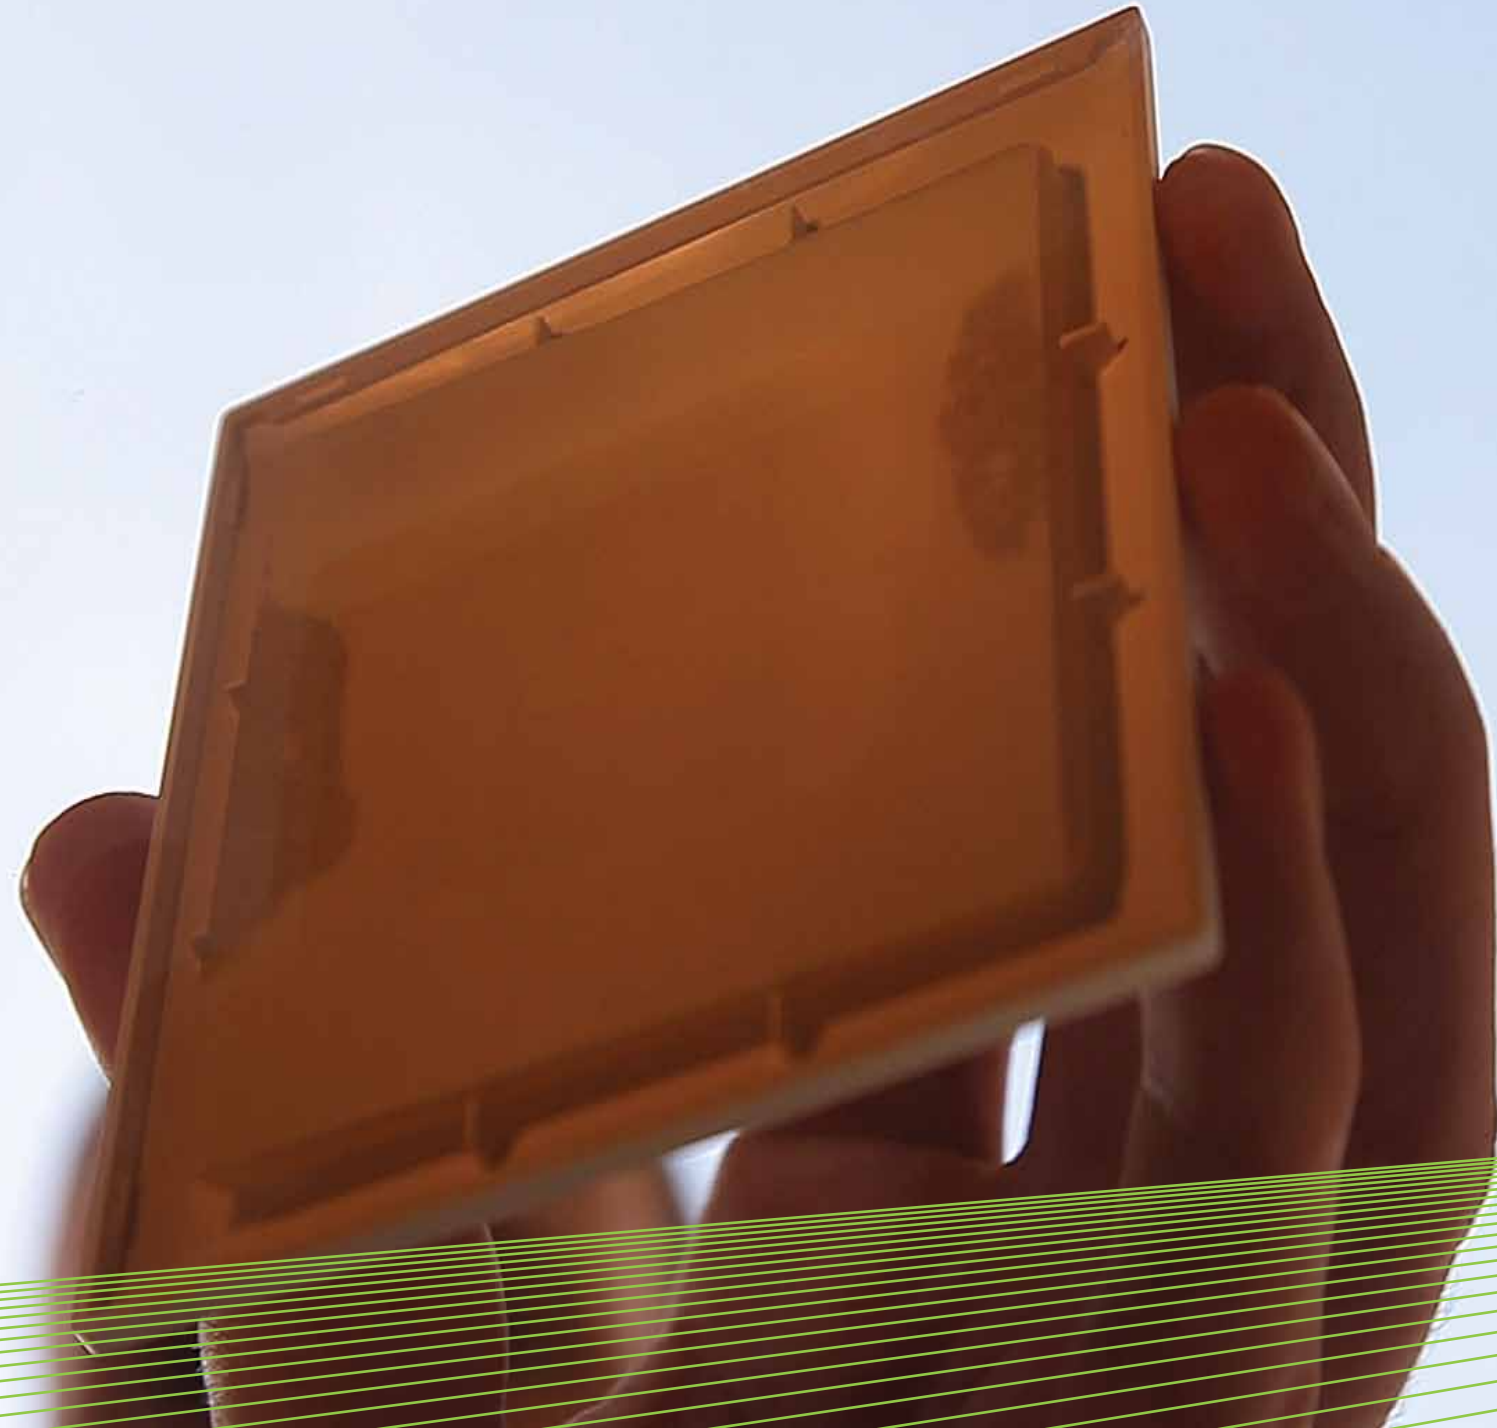

wake up sequence

This light switch  
is **wireless**

Applyable and removable  
by adhesive tape!

Increase the **IQ**  
of your building  
with **mivune**

lights „on“

**Everything** is possible
